

## Press release

26 October 2009

### EFOY Pro 2200

# MULTIPLEX presents the new fuel cell generation - EFOY Pro 2200

### 38% more power

The newest performer in the EFOY Pro Series has arrived – the new EFOY Pro 2200 for professional applications. Our new addition to EFOY Pro Series delivers 90 watt. It packs 38% more power than the EFOY Pro 1600 and features a charging capacity of 2200 watt hours a day.

### Qualified for more applications

The new EFOY Pro 2200 allows you to meet more demand by your customer and qualifying for more applications.

### Experience of 14,000 fuel cells sold

More than 14,000 fuel cells sold and a rich experience – that is the successful balance in the business of fuel cells. And now you will benefit from this experience. Adding to the EFOY Pro 600, EFOY Pro 1200, EFOY Pro 1600 family, the new EFOY Pro 2200 has been engineered to incorporate all experiences and improvements of the EFOY Pro Series. More power and a reduced consumption – EFOY fuels are the silent, environmentally friendly and 100% reliable power solution –anytime, anywhere.

### The EFOY Pro 2200 is available now!

MULTIPLEX is ready to provide you with further information on SFC Fuel Cells.

## About MULTIPLEX

Our main focus is to become a preferred supplier for our customers. We shall obtain this through

- **High quality products**
- **Accurate and timely information**
- **Short lead times**

In our battery division we have increased our flexibility by more staff in Denmark, as well as closer cooperation with our suppliers Sanyo, Panasonic, FDK, HYB, Varta and others. Through this enhanced cooperation we can supply cells and battery packs for all types of applications.

In our power division we have a very strong mix of DC/DC products from the two manufacturers: Brandner and Alfatronix providing a broad platform for DC-conversion in both industrial and mobile application. Along with Clayton Power and Scan-Antenna products we offer a complete range of products to the mobile requirement for power supply.
